Download and Install an old TRACE32 release Awaiting Agent

- Helpdesk robot

Hello I am interested in downloading the old version of TRACE32 SW.

I have the following debugger: LAUTERBACH LA-7708 POWER DEBUG-USB2 INTERFACE, W/ARM11+CORTEX+QDSP6

License numbers:

C05020056007: Valid until software version 2012.11

C11110153744: Valid until software version 2013.02

I checked the license on the TRACE32 Maintenance Check website and it is valid:

C05020056007: Valid until software version 2012.11

C11110153744: Valid until software version 2013.02

Could you please guide me how can I download the appropriate SW for that debugger and install it on both Windows and Linux Ubuntu machines?

Thank you!
