[DRA78x][DSP1] <1% bus error during statistical task profiling

Open Discussion

- LS Lionetti, Salvatore
- **Forum name:** #Debugging

Hi,

During the statistical task profiling I see the reported error:

Bus error at address ED:0x812DF928.

The address is mapped in DRAM and points to the intended data structure:

StartAddress Type Name
812df918 B ti_sysbios_knl_Task_Module__state__V
812df960 B ti_sysbios_family_c64p_Exception_Module__state__V

The error happen sometimes, on less than 1% of samples.

Please see the video attached.

Thanks

Hello Salvatore,

please try to set SYStem.Option.HighPriority ON

Regards,

Khaled
