Qualcomm Hexagon DSP debug Open Discussion

- BW Bob Wang
- **Forum name:** #Debugging

Hi,
We have purcahsed the Trace32 and Hexagon license before, but we don't know how to use it to debug Hexagon DSP on Qualcomm SA8155, SA8295, SA8255 SOC.
We are developing SW on Qualcomm Automotive Development Platform (ADP), do you have any training or guide about how to debug Hexagon DSP on Qualcomm SA8155, SA8295, SA8255 ADP?

#We purchased below devices: LA-3503, LA-3255, LA-3770, LA-3741A

Best Regards,
Bob Wang

Hello Bob,

you need to contact the Qualcomm support. They should be able to help you with these questions.

Regards,

Khaled
