S32K148EVB connects Lauterbach using JTAG port

- R RAIN
- **Forum name:** #Board Bring-Up

Hi,buddy

I have a trouble and can't solve it.

The Trace32's view has a red 'reset' word in below and right of window when I connected lauterbach and bord with jtag port.

So,why has this problem?and what we are going to do?

Please help me to connect and debug.

Thank you!

Hello, TRACE32 monitor the state of the reset pin and displays a red reset marker if it detects that a reset is asserted. Please check the status of the reset line with a scope.
