

Are there any known issues of the TRACE32 Software Updater?

2024-11-26 - Comments (0) - Setup / update

Here is a list of known issues of the current version of the TRACE32 Software Updater

- HTTPS proxy not supported.
 - Affected versions: 1 and newer
 - Affected operating systems: all
 - Description: This version does not support connecting to the update version through an HTTPS proxy. As a workaround, connect without proxy, or use HTTP or SOCKS proxy instead (if possible). A new version of the TRACE32 Software Updater will be published once HTTPS proxy support is available.
- File help.t32 is blocked and prevents update.
 - Affected versions: 1 and newer
 - Affected operating systems: Windows
 - Description: The file help.t32 is blocked by an open TRACE32 PowerView instance. Shut down all open TRACE32 PowerView instances and click Retry. If the file is still blocked, reboot the PC and try again.
- Syntax error after relaunching the TRACE32 Software Updater
 - Affected versions: 1 to 9926
 - Affected operating systems: all
 - Description: When the TRACE32 Software Updater downloaded a new updater client, you are asked to click on "Relaunch". Under some rare circumstances, you will get a "Syntax error in command line" and the update process ends.
 - Workaround: Start TRACE32 Software Updater again to remedy the problem.
- Old beta versions of TRACE32 Software Update no longer supported.
 - Affected versions: 1 to 8684
 - Affected operating systems: all
 - Description: TRACE32 Software Updater versions 1 up to 8684 (beta test versions) are no longer supported and the self-update feature is not functional. Please download the latest version here:
