Can I download an old TRACE32 release?

2025-06-05 - Comments (0) - Setup / update

The latest TRACE32 release is available for download either from the [Lauterbach Customer Portal](#) or through the TRACE32 Software Updater. To use this release without a demo time limitation, a valid software warranty is required.

If you would like to evaluate the latest version before extending your warranty, we offer a one-time temporary software warranty key valid for four weeks. You can retrieve this key [here](#).

The two previous TRACE32 release versions are also available for download from the [Lauterbach Customer Portal](#).

Please note that older TRACE32 versions are no longer available for download.

If you have any further questions, feel free to [submit a support ticket](#).
