Can I download an old TRACE32 release?

2024-10-24 - Comments (2) - Setup / update

Only the latest TRACE32 release is available for download either from the Lauterbach website or through the TRACE32 Software Updater. To use this release without a demo time limitation, a valid software warranty is required.

If you'd like to evaluate the latest version before extending your warranty, we offer a one-time temporary software warranty key valid for four weeks. You can retrieve this key [here](#).

Please note that previous TRACE32 versions are not available for download.

If you have any further questions, feel free to [submit a support ticket](#).

Can we order version to download to check compatibility?

Linda Bahloul

1 month ago

Hello Samarth, You can get an evaluation software, please visit <https://www.lauterbach.com>, select "Support & Training" then go to "Evaluation software". Best regards, Linda
