Can I write my own OS awareness?

2024-03-12 - Comments (0) - OS-aware debugging

Lauterbach provides to its customers an extension development kit (EDK) that can be used to write an awareness. The EDK is delivered by Lauterbach on request, [submit a new ticket](#) if you need to get the EDK and include the serial number of your TRACE32 product and your consent to the attached license.

The EDK is free of charge.
