## Discontinued Motif support for TRACE32

2025-12-19 - [Comments \(0\)](#) - [Announcements](#)

Starting from release 2026/02 Motif will be no longer supported on Linux hosts.

TRACE32 for Linux hosts requires Qt libraries to be installed.

- Minimum version:  
Qt 5.15.3

TRACE32 with Qt screendriver will start with **Multi Document Interface** (MDI) by default. To start with the **Multi Windows Interface** (MWI) like Motif, add the following **SCREEN=** option to the configuration file (e.g. config.t32):

```
SCREEN=  
MWI
```
