End of Support for Windows 7 and Windows 8

2026-11-10 - Comments (0) - Announcements

Official support for **Windows 7 and Windows 8** will be discontinued starting with versions after release R.2026.09.

Please note that versions released after December 2026 may continue to run on Windows 7 and Windows 8 for the time being. However, compatibility and proper operation are no longer guaranteed. We reserve the right to restrict or discontinue execution on these operating systems at any time and without prior notice.

Users are therefore advised to upgrade to a supported version of Windows to ensure continued compatibility and access to future releases.
