How can I realize a silent installation under Windows?

2024-01-12 - [Comments \(0\)](#) - [Setup / update](#)

1. For a simple software roll out of a company unique TRACE32 software installation, a network mount/drive will be used and the content of the TRACE32 DVD should be in a special directory on a server

```
xcopy D:\*.* N:\TRACE32DVD_201011 /E /V /L // drive and directory name are only  
an example
```

2. Record once a TRACE32 installation with the following instructions inside a command shell window:

```
N:  
cd N:\TRACE32DVD_202109\files\bin\setup64 // drive name N: and the  
directory is only an example // and must be  
replaced by the actual user-defined values  
setup.exe /r /f1"N:\TRACE32DVD_201011\bin\setup64\setup.iss" // /r stands for  
enabling recording the installation process // /f1 defines  
the file which will contain the recorded installation actions
```

Step through the complete TRACE32 installation process, the record will be saved in the setup.iss file.

3. Start a silence TRACE32 installation with the following instruction on a different PC:

```
setup.exe /s /f1"N:\TRACE32DVD_201011\bin\setup64\setup.iss" // /s means silence  
installation mode
```

If InstallShield didn't work correctly with a record file on the network drive, please use the following default place C:\rul\setup.iss instead.
