## How can I realize a silent installation under Windows?

2025-10-09 - Comments (0) - Setup / update

1. For a simple software roll out of a company unique TRACE32 software installation, a network mount/drive will be used and the content of the TRACE32 DVD should be in a special directory on a server

2. Record once a TRACE32 installation with the following instructions inside a command shell window:

Step through the complete TRACE32 installation process, the record will be saved in the setup.iss file.

3. Start a silence TRACE32 installation with the following instruction on a different PC:

 $setup.exe \ /s \ /f1"N:\TRACE32DVD\_201011\bin\setup64\setup.iss" \ // \ /s \ means \ silence installation \ mode$ 

If InstallShield didn't work correctly with a record file on the network drive, please use the following default place C:\rul\setup.iss instead.
