Is it possible to use Eclipse as debugger user interface instead of TRACE32 PowerView?

2026-07-30 - Comments (0) - TRACE32 PowerView

Lauterbach offers a TRACE32 integration to Eclipse based on Target Communication Framework (TCF). TRACE32 PowerView can be configured as a TCF agent. This integration is useful to access the debug functionality of TRACE32 from within an Eclipse-based interface. Simultaneous usage of TRACE32 PowerView and Eclipse is also possible.
Please note that extended TRACE32 functionality like trace views, MMU views and OS-aware debugging is not supported by this integration.
You can find more information about the TRACE32 integration to Eclipse in the application note TRACE32 as TCF Agent.
