[Linux] After release 2021/02 PowerView no longer starts with a Qt GUI on Ubuntu 16.04

2022-01-12 - Comments (0) - Setup / update

Starting with release 2021/02 Qt4 is no longer supported and the Qt5 minimum is 5.6. But Ubuntu 16.04 Xenial comes with Qt-5.5.1, which is too old for PowerView.

If you have control over your Ubuntu installation, either upgrade to a newer version (18.04 or later) or use external PPAs to update your Qt5 packages on Ubuntu 16.04.

Refer for more information to <https://launchpad.net/~savoury1/+archive/ubuntu/qt-xenial/>
