[MPC5xxx] Impacts of the Nexus probe on energy measurement

2026-08-11 - Comments (0) - MPC5xxx / SPC5xx

The following recommendations apply when performing energy measurements using the Nexus probe:

- When using the Nexus AutoFocus probe LA-7630, it is recommended to switch off the active termination.
- There is little difference between disabling the Nexus trace probe hardware with `Analyzer.DISable` and switching off the Nexus cell with `NEXUS.OFF`.
