Should I upgrade from PowerDebug E40 to PowerDebug E50 if I don't need Ethernet?

2026-03-10 - [Comments \(0\)](#) - [Setup / update](#)

No, you shouldn't, since the PowerDebug E40 is still an excellent device. However, if you want the exact same timing as a PowerDebug X50 or X51, you might want to consider the E50.
