## UTF-8 characters are garbled in the TRACE32 List window when displaying C source code. How can this be resolved?

2026-09-10 - [Comments \(0\)](#) - [TRACE32 PowerView](#)

- TRACE32 releases R. 2022 . 02 and earlier do not fully support UTF-8-encoded source files and may display certain non-ASCII characters incorrectly or as garbled text.
- TRACE32 releases R. 2022 . 09 and later provide improved support for UTF-8-encoded source files.

Therefore, upgrading to the latest TRACE32 release is recommended. If upgrading to the latest release is not possible, use at least TRACE32 release R. 2022 . 09.
