## What are the maximum input ratings of the Mixed-Signal Probe?

2025-10-09 - Comments (0) - Tracing

- Digital inputs: -5 V to 6 V
- ullet Analog voltage inputs:  $\pm 15~V$
- $\bullet\,$  Analog current inputs: -0.3 V to 30 V, but maximum differential input voltage is  $\pm 8$  V

These are absolute maximum ratings, derived from used components.
