What kind of power supply should I use with my PowerDebug/PowerTrace module?

2024-10-24 - Comments (0) - Setup / update

When your TRACE32 hardware is delivered, you will receive one of the following power supplies:

- Wall Mount Power Supply : delivered with the PowerDebug Module with USB interface only and the μ Trace®.
- Desktop Power Supply : delivered with the PowerDebug PRO, PowerTrace II and PowerTrace Serial

Please ONLY use the delivered power supplies. You can find more information in the [TRACE32 Installation Guide](#).

You can download the data sheet from the Lauterbach website (www.lauterbach.com) by searching for "Wall Mount Power Supply" or "Desktop Power Supply".
