Which information does the TRACE32 Software Updater send to Lauterbach?

2026-08-11 - Comments (0) - Setup / update

In addition to the information required by the HTTP protocol, like your IP address, the TRACE32 Software Updater only sends the information needed to update the selected TRACE32 installation. This is the host OS and a list of the files that the TRACE32 Software Updater needs to download in order to update the installation.
