Why do I see the message "HLL Debugging not licensed"

2026-05-13 - Comments (0) - Setup / update

This message appears in the TRACE32 status line and in the AREA window when the connected debug probe does **not** include a valid debug license for the selected CPU.

For further information:

- In TRACE32, go to **Help > Support > System Information...**
- Click **Save to File**
- Submit a support ticket and attach the saved file.

Please note that this message is **not** related to your software maintenance status.
